This 4-part workshop focuses on building teacher knowledge as well as the application of basic grammar concepts. We will explore how to incorporate foundational grammar concepts with students who have a very basic knowledge of phoneme-grapheme correspondences and are only reading simple one-syllable words with short vowels and also see how this can be expanded and applied to students at any level. Walk away with resources and ideas of how to bring this into your classroom or your tutoring sessions!

Although this course was designed to complement Fundamentals training by Fundamental Learning and is suited for O-G practitioners who wish to expand their teaching of grammar, it is not a prerequisite.

Anyone can join!

Course Instructor: Liisa Freure M.Ed, OCT, ATF/OGA, SLDS/CERI-IDA

If you have previously attended the Introduction to Multisensory Grammar Course, and would like to audit, please contact <mailto:liisafreure@funlearning.ca> to receive a DISCOUNT CODE!

There will be some materials to print/gather/prepare in order to participate fully and get the most out of this workshop.
