

COMMENT from previous attendee:

*This was a phenomenal workshop!
It really helped me consolidate how the English language is constructed and the relationship between etymology, phonology and morphology. I have taken away so many practical strategies and ideas to help my clients make these meaningful connections when learning to spell words.*

Liisa Freure M.Ed., OCT,
ATF/OGA; Trainer/OGC

Introduction to Word Inquiry

Tuesdays \$260 CAD
5:30—8:30 pm ET

Word Sums

<ab> + <duct> + <ed> → abducted

<by> + <pro> + <duct> → byproduct

conduction → <con> + <duct> + <ion>

deductible → <de> + <duct> + <ible>

Discover a powerful way to explore how words are built, connected, and shaped by their histories. This workshop introduces **practical tools**—including word sums, matrices, and sorts—for investigating **morphological structure** and uncovering relationships among words that share morphemes.

Through engaging examples, participants will examine how **phonology** interacts with **morphology** and explore how **etymology** can reveal deeper connections and enrich our understanding of words and their histories.

*Research shows
that teaching
morphology can
strengthen
vocabulary, word
reading, reading
comprehension,
and spelling!*

*This workshop counts toward OGA
CEU requirements and Clinical Level
coursework when training with
Fundamental Learning.*
