Making sense of language

TEACHER WORKSHOP SERIES

Introduction to Multisensory Grammar

Have you been learning about the science of reading or structured literacy? Wondering about how (or if) grammar fits into the picture? JOIN US to learn the basics of parts of speech, sentence structure, the importance of form and function, and how to represent grammar concepts with colours and symbols.*

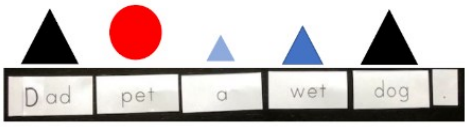

DATES: Tuesdays – February 2, 9, 16, 23, 2027 *6:00 pm – 8:30 pm ET*

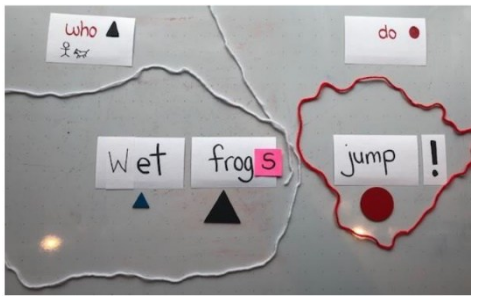

WORKSHOP LOCATION: Virtual – Synchronous meetings using ZOOM with handouts and additional support materials available on the course site.

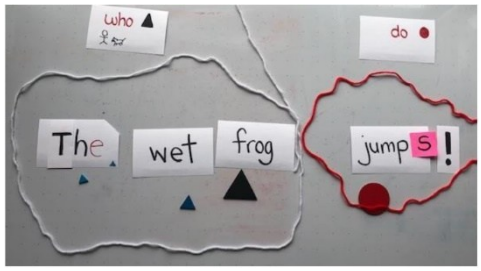

CLICK HERE TO REGISTER $260 CAD

This **4-part workshop** focuses on **building teacher knowledge** as well as the **application of basic grammar concepts**. We will explore how to incorporate this with what you are already doing, beginning with students who have only a very basic knowledge of phoneme-grapheme correspondences and may be only reading simple one-syllable words and then see how to apply these strategies and build on this base to teach more advanced concepts.

Walk away with resources and ideas of how to bring this into your classroom or your tutoring sessions!

* *Using Montessori grammar symbols as basis (with some adaptations and extensions)*

Course Instructor: Liisa Freure M.Ed., OCT, ATF/OGA, Trainer/OGC, CALT-QI/ALTA, SLDS/CERI-IDA

I learned so much! I didn't realize how much I didn't know about grammar and how helpful it can be to all students! You always do a nice job breaking things down in an understandable way and I have been able to implement many of your ideas already.

– Classroom Teacher

The sessions were very interactive and a perfect length. The grammar course crystalized my understanding of grammar principles I had previously been introduced to in my Montessori training. It also gave me a chance to learn how to apply grammar in my O-G lessons right from the beginning even with young students.

– Gemini (Tutor)
